US-PAT-NO:

6285658

filed 1/7/00

issued 9/4/01

DOCUMENT-IDENTIFIER: US 6285658 B1

TITLE:

at

store and

System for managing flow bandwidth utilization
network, transport and application layers in
forward network

----- KWIC -----

US Patent No. - PN (1):

6285658

Detailed Description Text - DETX (72):

A connection hash table 402 facilitates indexing into a plurality of TCP connections, each TCP connection having an associated flow, such as flows 300, 299 and 298 of FIG. 3. A plurality of TCP control blocks 404 are used to track connection-related information for each TCP connection. Host-related information is tracked using a plurality of host information control blocks 406, indexed by a host hash table 408. Information about particular hosts corresponding to TCP connections is tracked using the TCP control block 404.
